PROFESSIONAL PROFILE

Software Engineering student developing practical skills in web development and software engineering. Learning to build responsive user interfaces with HTML, CSS, JavaScript and React, while developing backend knowledge with Java, Spring Boot, REST APIs and databases. Interested in building useful, maintainable applications and growing through hands-on projects and internship opportunities.

EDUCATION

Software Engineering — Arba Minch University

University student | Graduation date not provided. Relevant study areas include Object-Oriented Programming, data structures, networking, operating systems, and requirements engineering.

TECHNICAL SKILLS

Frontend	HTML5, CSS3, JavaScript, React, responsive layouts
Backend	Java, Spring Boot fundamentals, Node.js fundamentals, REST API concepts
Databases	MySQL fundamentals, SQLite, SQL/JPA concepts
Tools	Visual Studio Code, Git/GitHub fundamentals, npm, Vite
Core concepts	Object-oriented programming, component-based UI, HTTP/API integration

ACADEMIC & PERSONAL PROJECTS

E-Commerce Web Application

Learning project using a React frontend and Node.js backend; practiced product displays, cart data, order pages, API requests, and SQLite-backed data.

School Management System

Website project concept with dashboard and school administration sections, organized into separate HTML, CSS, and JavaScript files.

Student Registration System (Java)

Object-oriented group project exploring classes, inheritance, enums, generic repositories, and CSV-based CRUD operations.

Student REST API (Spring Boot)

Beginner Spring Boot API returning student information as JSON; practiced connecting a frontend to a backend endpoint.

ADDITIONAL INFORMATION

Career interests: Java backend development, full-stack web development, and software engineering internships.

Languages: Somali and English.

Employment: No formal employment details provided; this CV highlights academic and personal projects.
